

# Product Data Sheet

## Stationary Cable Reeler

This self-contained cable reeling system comes with the following features and options:

- Adjustable speed level wind
- Gate enclosure to protect working reel
- Frame and drive rated for 20,000 lbs
- Accommodates various sized steel or wooden reels from 48" up to 72" diameter
- Optional wired or wireless remote

### Drive System Specifications:

- 10-40 HP drive system
  - 25 Gal reservoir
- Self-contained controls with diesel hydraulic power pack
- Various speed hydraulic power pack, forward and reverse operation
  - Hydraulic braking system

This cable reeler was originally designed for high tension application of wire rope for large mobile cranes and was placed inside a protective cage on the work site. For a different application, this unit would be completely enclosed with gear guards and a safety framework for operator safety.

### Overall Dimensions:

120" long x 80" wide including gear system x 81" tall.  
Maximum reel width is 48".
