

# CABLE REELERS AND CABLE REELS

## Mine Cable Services Corp. Cable Reeler Systems

MCS specializes in custom designed and built cable reelers and cable reels to suit your needs, or to match your systems already in place

All MCS cable reelers are designed for maximum flexibility in use of operations and can be custom designed and manufactured to customer requirements and specifications.

All components are engineered and manufactured to industrial and mining grade requirements.

Cable reelers are available with either hydraulic or electric drive systems.

Drive system options include chain drive, gear drive, or rim drive

Level wind system available for most reelers.

Remote control options include corded or wireless units

Available for a wide variety of cable sizes up to 35kV.

MCS Steel reels are manufactured to withstand the requirements of heavy field use and to accommodate cable couplers.

Left: Truck Mounted Cable Reeler with self contained diesel hydraulic power pack. Reel is mounted on a slew bearing, allowing 180° rotation. Includes wireless remote control and level wind.

Right: Equipment Mount Cable Reeler mounted on a 980 Cat Loader with quick attachment system. Shown with hydraulically driven layout arm. Available with cable reels that are specifically designed for use with this reeler.

Left: Energized Slip Ring Cable Reeler. Designed to reel 1000ft of 8kV cable in one direction, and 150ft of 8kV cable in the other. Maintains constant cable tension to payout or take up cable without operator input. Self contained hydraulic power unit is powered from onboard cable via a transformer with optional wireless remote control to operator if manual operation is required.

Right: Skid Mounted Cable Reeler with fixed 96" diameter reel. Chain driven with diesel hydraulic power pack. Designed with a level wind, can be used for pulling or paying out cable.

### General Specifications & Options:

- Diesel Hydraulic Packs range from 9-45HP
- Electrical output ranges up to 10 HP
- Cable reels manufactured up to 120" diameter
- Cable reels options are compatible with CWS and WBM

Above: Shore Based Cable Reeler with dielsel hydraulic power pack. Includes wired remote control, disc brakes, and level wind. Designed for 3000 ft of 5kV, 2/0 SHD-GC cable, interchangeable reels, and a max. payload of 20,000lbs.

Above: Chain and sprocket driven, fixed reel cable reeler. Light and portable for easy movement in and around your cable repair facility. Powered by single phase, 240V, 5HP motor via reduction gearbox.

Above: Rail Mounted Cable Reeler, designed for mounting on tracks inside an underground tunnelling operation to feed TBM's

Left: Trailer Mounted Multi-Reel System for electric utility use. Includes self contained 45HP hydraulic power pack, storage units for tools & accessories. Each reel is designed for 1000 feet of 25kV, 2/0, 1C flexible power cable.

Custom Manufacturing is our speciality. Please contact us today to discuss your ideas and requirements for your cable reeler and reels to best suit your needs.

**Rental Unit - Portable Rim Drive Rental Reeler with Power Pack**

- Reel Stand with self contained power pack
- Reel Stand is adjustable to accommodate reels up to 120" diameter and 96" width
- Maximum weight of unit is 20,000 lbs.
- 10HP power pack, either diesel hydraulic or electric-hydraulic
- Rental units are supplied with one engineer certified spindle to accommodate your specific reel weight and dimensions.
- Rental unit as shown with hydraulic power pack and spindle is also available for purchase

**Custom Manufactured Cable Reels, available to purchase as individual units or with reelers above**
