

Product Data Sheet

RHSHD-X, Heavy Duty Rocking Horse Skid with Strain Relief Support

- Custom manufactured skid elevates your junction boxes off the ground while making your cable's connection points clearly visible to maintenance personnel and site traffic.
- Stinger Strain Relief Clamps on each end help prevent cable from being pulled out of connection points, reducing cable damage.
- Stinger Strain Relief rubber liners are sized specifically to your cable diameter.
- Heavy duty tow hooks allow for easy skid repositioning to different locations without putting stress on your cable and connection points.
- Positioning of center brackets will accommodate junction boxes in use at your location (dimensions to be confirmed at time of order)
- Standard available colours are safety orange or safety yellow. Colours can be customized to suit your operation's requirements.
