

RHSLD-01 Light Duty Rocking Horse Skid

Lightweight yet rugged, the Mine Cable Services Light Duty Rocking Horse Skid elevates and provides visibility of inline electrical coupler connections for maintenance personnel and minesite traffic in the field. Conforming to minesite regulations to elevate electrical junction points, the MCS Light Duty Rocking Horse Skid design offers roll over protection for electrical couplings if electrical cable is inadvertently dragged by larger mine site equipment, reducing coupler damage and equipment down time. The MCS Light Duty Rocking Horse Skid also serves to keep electrical coupling points up and away from mud, dirt, or snow and can be easily towed and repositioned on site by light duty minesite vehicles.

Product Features and Benefits:

- Elevates coupler junction points for visibility to maintenance personnel and minesite traffic
- Conforms to minesite regulations to elevate coupler junction points in the field
- Provides coupler roller over protection, reducing damage and equipment down time
- Elevates cable junction points up and away from mud, dirt, and snow
- Light weight and rugged design easily repositioned by personnel or light duty minesite vehicles
- Standard color is high visibility orange (or to customer specifications)
