

Skid Mounted Electric Cable Reeler

Product Data Sheet

Compact and robust, the Mine Cable Services Skid Mounted Electric Cable Reeler features a fixed reel, chain driven design, powered by an electric variable speed system making this unit very suitable for in-shop use. Electrical features of the Skid Mounted Electric Cable Reeler include 5HP heavy duty VFD Industrial Drive with touch pad control for forward and reverse, with adjustable speed. Standard drive components for the Skid Mounted Electric Cable Reeler includes a heavy-duty induction motor/gearbox transmission drive. Manufactured as a skid mounted unit, the Skid Mounted Electrical Cable Reeler is easily repositioned within your operation. To ensure safety of cable repair personnel, the Skid Mounted Electrical Cable Reeler includes an emergency stop button external to the drive module for easy and quick access. All drive moving parts and pinch points are enclosed within safety guards.
