

Cable Repair Tool Kit

To best support customer needs when completing electrical cable repairs on site and in the field, Mine Cable Services offers a complete Cable Repair Tool Kit. Often purchased and issued to each cable repair technician, Cable Repair Tool Kits include all the general hand tools, power tools, equipment, and specialized MCS manufactured tools required to easily complete a cable repair. Whether completing a simple jacket repair or full vulcanized cable splice, providing your technicians a complete tool package increases efficiency by reducing time spent searching for necessary equipment, ensuring the correct tools are at hand to properly complete each cable repair.

Example of tools available in the MCS Cable Repair Tool Kit

VTC-1000W
