

Cable Repair Patch Kit

To quickly and easily repair minor cable jacket damage, Mine Cable Services recommends the use of a rubber Cable Repair Patch Kit. Made of a two part, cold-curing rubber compound, Cable Repair Patch kits quickly repair a cable's outer jacket damaged from improper handling or abrasion wear. Excellent for temporary emergency field repairs, Cable Repair Patch kits quickly cure while at room temperature, reducing operational downtime by returning repaired cable back into service quickly.

Completed Jacket Repair Patch

Example of damaged cable jacket suitable for Cable Repair Patch Kit

Product Features and Benefits:

- Simple to prepare and apply to damaged area in shop or in the field.
- Emergency jacket repairs completed quickly, reducing operational downtime.
- Easy to use two part cold-curing rubber compound.
- Provides good electrical and chemical resistance.
- Excellent mechanical strength, durability, elasticity, and abrasion resistance.
- Bonds to a variety of rubber products including neoprene, nitrile, polyurethane, and PVC plastic.
- Kits include all necessary cable preparation materials and application tools.
