

Silver Soldering Materials and Equipment

Mine Cable Services supports silver soldering as a preferred method to join cable connectors during cable repair procedures to retain the strength and conductivity of the original cable. MCS manufactures and supplies a variety of equipment and materials to ensure repair technicians have everything at hand for quick and efficient cable repairs. Materials and equipment include silver solder, silver solder paste, torch assemblies, as well as custom manufactured tools designed specifically for silver soldering operations on trailing and reeling cables.

Product Specifications and Ordering Information:

Photo:	Part Number:	Description:
	Silver Solder Rods EFSS-02S	Silver Solder Rods, 500g packages
	Silver Solder Flux Paste EFSP-02-HAR	Silver Solder Flux, 4 oz jar
	Cable Repair Soldering Pliers CRSP-01	Designed as an adjustable and locking clamp to securely hold to ends of conductor into position for accurate soldering
	Torch Handle Kit THK-316	Oxyacetylene Welding Torch handle with brazing nozzles and cleaning tool, for use with 3/16" hose
